

The Wisconsin "No Call" needs to remain in place, as is, no changes.

Why? Because it gives us--the public, a single point of control to prevent unwanted sales & marketing calls/interruptions directly into our own personal homes/property...where we're living, eating, raising families, or whatever we so desire. We can choose to turn off the television when we're not interested in watching commercial solicitations, but we can't turn off our phone--reasons are obvious. We need to remain in control of turning off phone marketing; there are plenty of avenues for marketing, the phone should not be one of them.

Please leave the law in place, as is.

Thankyou.

Eric Lien
